

Poutník — user guide: Toyota Land Cruiser 2.8D

Informative translation — the Czech version prevails.

2021 model · 5 seats · no fixed beds

2.8 D-4D 150 kW (204 hp) · automatic

Permanent 4×4 with diff lock

Diesel

• 1. Before you drive

- Category B licence, fuel is **diesel only** — never petrol.
- Tyre pressure is monitored by the onboard computer; optimal **2.6 bar** (per the door-jamb sticker; can be lowered off-road and re-inflated on returning to asphalt).
- Lower the pressure for off-road driving, and re-inflate to the road value on returning to asphalt.
- Check the roof rack and the presence of the ladder (if a tent is fitted).
- Large boot — secure any load before driving off-road.
- The vehicle manual and service book are in the passenger-side glovebox. First-aid kit, 2 hi-vis vests, warning triangle and accident report form are there too; a full-size spare wheel, jack and tools are included.

▲ 3. 4×4 drive — CAUTION

- **H4** = the normal mode for all driving, including dry asphalt — it does not switch depending on the terrain.
- **L4** (low range) — first **stop** the vehicle, put the transmission in N, only then turn the selector; then drive slowly, max. approx. 40 km/h, off-road only.
- In L4 the centre differential locks automatically. It can be locked manually only in H4, on a slippery surface, while driving slowly and straight ahead — always switch it off before returning to asphalt.
- DAC (downhill assist control) works only in L4 mode — do not use the accelerator, let it do the work.
- Wading — max. depth **700 mm**; drive at walking pace, without stopping in the middle of the crossing.

• 5. Refuelling and consumption

- Diesel tank **87 l**.
- Approximate consumption 9–11 l/100 km, more off-road **[[Karel to confirm]]**.
- Approximate range on a full tank: 800–900 km.

• 2. Controls

- Start with the button, automatic: selector P–R–N–D.
- **Manual parking brake** (lever) — always apply when parked, release fully before moving off.
- H4/L4 off-road mode and diff-lock selector — centre console (see block 3).
- The off-road driving modes (Multi-Terrain Select / Crawl Control) can only be switched in **4×4 Low (L4)**.
- Cruise control, air conditioning, roof rack.

• 4. Equipment and accessories

- The vehicle is prepared for a roof tent for 2 people (surcharge, fitting + ladder).
- Always drive with the tent **closed**, maximum speed with the tent 110 km/h.
- Roof rack, tow hitch.
- Basic kit included (blankets, pillows, stove, crockery, torch).

• 6. Return and contact

- Vehicle exterior and chassis cleaned after off-road driving, **full tank**.
- Tent removed/stowed, return both keys (main and spare), we recommend photographing the vehicle.
- Office Mon–Sat 9am–9pm: **+420 723 707 958**
- Roadside assistance: 24/7 on the same number · honza@frantisekdron.cz
